DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2) requires a legible copy of: (1) each foreign patent; (2) each publication or that portion which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper (IFW) system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications, applications, or other information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609.04(a), subsection I. states, "the list ... must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Theil et al. (U.S. 6,396,118 B1).

5. Regarding claim 4, Theil et al. discloses an optical microsystem, comprising the close association of a monolithic electronic chip of a thickness of one or more hundred microns, bearing on its front a dot matrix array and electrical contact lands, and an optical structure for forming an overall image corresponding to the array, the optical structure being placed against the front of the chip, with electrical contacts on the back of the chip and conductive vias between these electrical contacts on the back and the contact lands on the front, for access to the matrix array (col 3, lines 49-67).

6. Claims 4 and 5 are rejected under 35 U.S.C. 102(a) as being anticipated by Tao (U.S. 2003/0214618 A1).

7. Regarding claim 4, Tao et al. discloses an optical microsystem, comprising the close association of a monolithic electronic chip of a thickness of one or more hundred microns, bearing on its front a dot matrix array and electrical contact lands ([0025]), and an optical structure for forming an overall image corresponding to the array ([0027]), the

optical structure being placed against the front of the chip ([0028]), with electrical contacts on the back of the chip and conductive vias between these electrical contacts on the back and the contact lands on the front, for access to the matrix array ([0025]).

8. Regarding claim 5, Tao et al. discloses that the optical microsystem forms a liquid crystal microdisplay which uses an associated optical structure a cavity filled with liquid crystal and sealed by a plate comprising a back electrode, the liquid crystal being situated between the chip and this plate ([0026]).

Allowable Subject Matter

9. Claims 1-3 and 6 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Tao et al. (U.S. 2003/0214618 A1) is the closest prior art of record. Tao et al. discloses the limitations of claim 1 except dividing of the wafer into individual optical microsystems occurs along the same cutting lines, which is not taught or rendered obvious from the prior art. Claims 2-3 and 6 depend on claim 1.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kawakubo et al. (2005/0104204 A1), Kao et al. (2007/0004087 A1), and Tao et al. (U.S. 6,822,624 A1) disclose packaging methods.
